### Paper Tape

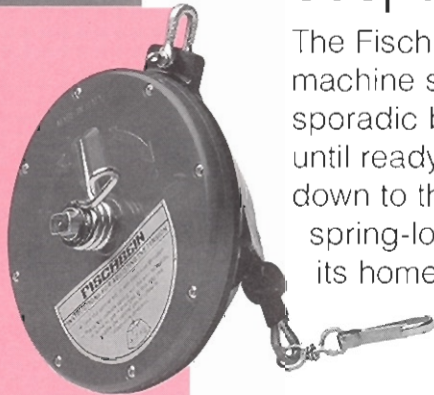

To show your customer just how important your product really is, use Fischbein crepe tape. With Fischbein crepe tape for portable sewing machines, you get the double benefits of strong bag closing protection and colorful visual appeal. Fischbein crepe tape is available in natural, black, red, white and blue.

### Tape Attachment

Used by many to apply an attractive two inch wide crepe tape over the bag top, the Fischbein 1650 tape attachment is a lightweight three-part attachment which features a tape holder, folder and tape cutter. The Fischbein tape attachment allows for precise tails at both the leading and trailing edge of the bag for an attractive closure.

### Suspension Unit

The Fischbein 1550 suspension unit keeps your portable sewing machine safely suspended above the working area. Ideal for sporadic bagging, the suspension unit holds the machine up until ready for use by the operator. The machine is then pulled down to the bag top level for use. When released, the durable spring-loaded suspension unit retracts the machine back to its home position. The Fischbein 1550 is the perfect answer to minimizing machine damage and operator fatigue.
